

PROFESSIONAL SUMMARY

Java Full Stack Developer with 2+ years of experience in designing, developing, and maintaining enterprise-grade applications in the Banking and Financial Services domain. Proficient in Java, Spring Boot, Microservices, JSP, Hibernate, JPA, RESTful APIs, and Apache Tomcat. Experienced in developing scalable backend services, implementing secure authentication using JWT and Keycloak, and working with PostgreSQL and MS-SQL databases. Skilled in CI/CD practices using Jenkins, Docker, Maven, Git, Postman, Swagger, and Jira. Strong understanding of Object-Oriented Programming, Design Patterns, SDLC, Agile methodologies, and production support.

TECHNICAL SKILLS

Languages	: Java, SQL, HTML, CSS, JavaScript, React
Frameworks	: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JSP
Security	: JWT Authentication, Keycloak
Technical Skills	: Object Oriented Programming, Data Structure and Algorithms, REST API Design and Development, Database Management System, Microservices, Keycloak
Databases	: MySQL, PostgreSQL, MS-SQL
IDEs	: Eclipse, STS, IntelliJ IDEA
Tools	: Git, GitHub, Maven, Jenkins, Docker, Jira, SonarQube, Postman, Swagger, Claude

EXPERIENCE

Java Developer Hitachi Payments Services	April 2026 – Present Mumbai, Maharashtra
Project: Merchant Acquisition and Registration System (MARS) - Developed Merchant Onboarding Module for merchant registration, profile management, document verification, and approval workflows. - Designed and developed Recon (Reconciliation) Module to support transaction validation, settlement processing, exception handling, and reporting activities. - Designed and implemented RESTful APIs for merchant onboarding and reconciliation operations. - Developed and maintained JSP-based user interfaces for merchant onboarding, merchant management, and reconciliation functionalities. - Created and optimized SQL queries and Stored Procedures to improve data processing efficiency, reconciliation operations, and report generation. - Technologies used: Java, Spring Boot, REST APIs, JSP, MS-SQL.	
Jr. Java Developer SATMAT Technologies Pvt. Ltd. (Client: Hitachi Payments Services)	Feb 2025 – March 2026 Pune, Maharashtra
Project: Dynamic Currency Conversion (DCC) Portal - Designed and developed scalable microservices-based applications for Merchant Portal using Java and Spring Boot. - Integrated backend applications with Keycloak for authentication and role-based access control. - Improved website performance and speed through optimization techniques by 55% - Troubleshoot and fixed bugs and issues in the backend to ensure smooth operation of the applications - Technologies used: Java, Spring Boot, REST APIs, Microservices, PostgreSQL.	
Software Engineer Infopeer Software Solutions Pvt. Ltd.	Feb 2024 – Feb 2025 Pune, Maharashtra
Project: Integrated Eligibility System (IES) - Designed backend APIs for the Integrated Eligibility System (IES) to reduce manual efforts for DHS daily tasks. - Worked with REST APIs to retrieve and display data from databases - Wrote unit tests for REST APIs achieving approximately 80% test coverage - Technologies used: Java, Spring Boot, REST APIs, Microservices, MySQL.	

EDUCATION

Centre for Development of Advanced Computing (CDAC) Post Graduate Diploma in Advanced Computing (PG-DAC)	Mumbai, Maharashtra, India
North Maharashtra University Bachelor of Technology (B.Tech)	Jalgaon, Maharashtra, India
